**To promote QO100 activity in India and because of bad HF propagation (also the VHF and UHF repeaters don't cover the whole country) a "Morning Net" will be established with planned activities including Emergency and Disaster management Communication, Weather reports, Operating Setup working conditions and any Medical requirements.**

**The following information is from Saro, VU3OBR:**

- **The Name Of the Net is : Qatar Oscar-100 INDIA Morning Net.**
- **The Net will Start from 15th of August.**
- **The Net will be 1.30am to 2.00am UTC at all days.**
- **Net controller's : VU2ICI - Mohan, VU2GRM - Ram, VU3OBR - Saro.**
- **Net frequency: 10,489.690 GHz**

**I suggest to add the word 'India' (because here 01.30 UTC is not morning ; -)**

**Good morning, I have scheduled, from 1.30 to 02.00 UTC, the automatic audio recording of the NETs, which will be available at the following address:**

**<http://websdr.is0grb.it/QO-100-India-NET>** (<http://websdr.is0grb.it/QO-100-India-NET>)

**I also added an "India-NET" label to 10489690 in the WebSDR**

**<http://websdr.is0grb.it:8901>** (<http://websdr.is0grb.it:8901>)

**73**
